Planting the Seeds
of Language Learning
Through Nature.
Bringing
environmental
education and second
language learning to
early childhood.

We are excited to introduce you to Eco-Lingua Kids — a transnational initiative co-funded by Erasmus+ that aims to promote early second language (L2) acquisition through nature-based learning activities.

Our goal is to help children develop both language skills and environmental awareness from an early age, while supporting educators with practical, inclusive, and engaging resources.

Project Objectives

- 🌍 Promote early bilingualism through experiential learning
- 🌱 Encourage ecological thinking and connection to nature
- 👩🏫 Empower teachers with accessible, high-quality materials
- 🤝 Foster collaboration between schools, families, and communities

ECO

PROJECT UPDATES

Who's Involved?

The project brings together committed partners from across Europe:

• Cyprus • Greece • Ireland • Italy • Spain • Turkey

Each organization contributes its unique expertise in early childhood education, sustainability, language learning, and teacher training.

SOON What's Coming Next?

We are now moving into the content development phase — designing educational materials, pilot activities, and starting work on the project's digital platform and e-learning tools.

Stay tuned for updates in our next newsletter!
