Growing
Through Practice-
Bilingualism
blossoms when
rooted in nature.

Welcome to Our Third Update!
As autumn settles in, we're excited to share the fruitful outcomes of the past few months. The Eco-Lingua partnership has been hard at work — researching, writing, designing, evaluating, and now bringing our bilingual, nature-based learning tools to life! Below, you'll find what we've completed and what's coming next.

Spotlight on the Eco-Lingua E-Book for Educators

One of our major milestones this period was the development and completion of our multilingual E-Book — a hands-on resource for educators aiming to introduce second language learning through environmental activities.

PROJECT UPDATES

Evaluation that Grows With Us

Throughout the process, we've taken care to build a tool that is both meaningful and practical. Internal evaluations by partners and educators led to key improvements, while the external evaluation confirmed the resource's clarity, flexibility, and innovation.

Looking Ahead

As we move into the next phase, our focus will be on:

-  Sharing the e-book through piloting and teacher training
-  Expanding the e-learning platform with additional modules and activities
-  Ongoing dissemination through social media, articles, and school networks

Spread the Word

Please continue to support the project by:
Sharing our posts
Using the materials in your classroom
Sending us feedback and photos!

A WORD FROM THE TEAM

"It's been a wonderful process of co-creation. The e-book feels alive it speaks the language of children, of nature, and of collaboration"
