Piloting Phase &
Multiplier Event
Highlights

Piloting Phase &
ME Completed
Across Partner
Countries

Welcome to the sixth edition of the Eco-Lingua Kids Project Newsletter!

The ECO LINGUA project successfully completed its piloting phase, during which partners tested the educational materials, digital tools, and activities designed to integrate language learning with environmental education for young learners.

Participants explored the project's innovative methodology and provided valuable feedback regarding:

- ease of use and clarity of the digital platform
- effectiveness of eco-lingua activities in early childhood settings
- engagement of children through games, stories, and interactive tools
- practical recommendations for improvements and final adjustments

This feedback is now being incorporated into the final version of the ECO LINGUA resources, ensuring that the project delivers high-quality, user-friendly tools for educators across Europe.

PROJECT UPDATES

★ Multiplier Events: Sharing ECO LINGUA with the Wider Community

Following the piloting phase, partners organised their Multiplier Events to present the project's outcomes to educators, trainers, stakeholders, and local communities.

These events showcased the results of more than two years of collaborative work, including:

- the E-book
- the e-library of eco-themed resources
- the e-platfrm
- examples of activities developed during the project
- insights and testimonials from the piloting phase
